

Tumps change register

v2.2 of the P30 Appendix (Christmas 2013) to v14 of the DoBIH (Easter 2014)

Note: unlike previous versions, this change register includes all 16,723 Tumps, not just those previously part of the P30 Appendix. However, it is only concerned with data relevant to each hill's listing as a Tump, so, for example, changes in height leading to a Corbett Top becoming a Murdo (or vice versa) are not covered here.

Deleted Tumps

The size of this list in this update is due almost entirely to a comprehensive survey of all the hills whose drop was given as 30 or 31 metres, which inevitably turned up more than a few hills which fell foul of the newly available large-scale mapping...

Relocations and Replacements

This includes relocations of just 200 metres up to distances of over a mile. In each case the new entry replaces the hillnumber of the old, so users of both the DoBIH and hill-bagging.co.uk are encouraged to check that their logs are still valid. (In the case of major relocations – they won't be!) If the old location was included under a different name, this is indicated in the rightmost column.

'Relocations' due to typos in grid reference

It was necessary to include these because I know how hard it is to find the hill when you don't know which bit of the grid reference is faulty!

Significant name changes

Not every name change is included here; there were typos that have been corrected, or instances where the Gaelic was subtly wrong. In such cases the sense of the name is still clear.
