

## Tumps change register

**v2.0 (09/05/2013) to v2.1 (18/08/2013)**

### New Tumps

There were an exceptionally large number of new Tumps in this update, due mostly to a systematic survey of the British coasts with the new large-scale mapping from Geograph, looking for previously missed sea stacks and small islands over 30m high. Credit is due to Mick Moore for finding at least a dozen new islands in Cornwall, as well as many other contributors.

## Relocations and Replacements

This includes relocations of just a hundred metres up to distances of over a mile. In each case the new entry replaces the hillnumber of the old, so users of both the P30 Appendix and hill-bagging.co.uk are encouraged to check that their logs are still valid. If the old location was included under a different name, this is indicated in the rightmost column.

## 'Relocations' due to typos in grid reference

It was necessary to include these because I know how hard it is to find the hill when you don't know which bit of the grid reference is faulty!

Number	Name	Region	New GR	Old GR

## Significant name changes

Not every name change is included here; there were many typos that have been corrected, or instances where the Gaelic was subtly wrong. In such cases the sense of the name is still clear.

## Removed to DoBIH

These are the only hills that have changed their hillnumber. Users of the database will need to transfer their logs over. The process should be automatic on the website.
